The working principle of the PowerTube®-TENS-Technology

Swiss PowerTube

The working principle of the
PowerTube®-TENS-Technology

PowerTube® is a registered and certified medical device for pain relief.

The PowerTube® device works on the skin and cycles through three stages that use high frequencies to provide relief.

Alternating current and frequencies corresponding to the water molecule make PowerTube® a device different to other devices on the market.

With 300,000 PowerTube® used worldwide, you can trust that with its convenient, simple and easy to use design this highly functional device will become your best friend.

Swiss PowerTube

The working principle of the
PowerTube®-TENS-Technology

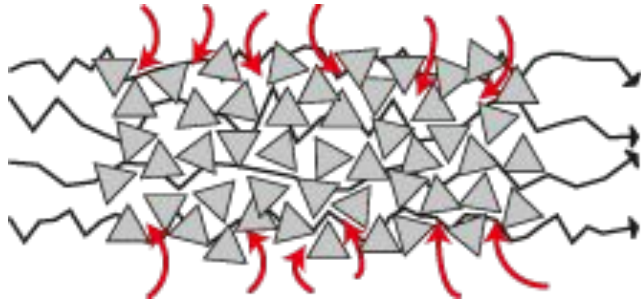

- **A significant increase in body energy**
- **Molecular structures come back into their own system of order**
- **Energetic blockages dissolve**
- **The body's own regenerative powers are mobilized**

According to Dr. medical Peter Laatsch has the following positive effects on the human organism, which are also supported by studies by the University of Munich:

The working principle of the PowerTube®-TENS-Technology

.

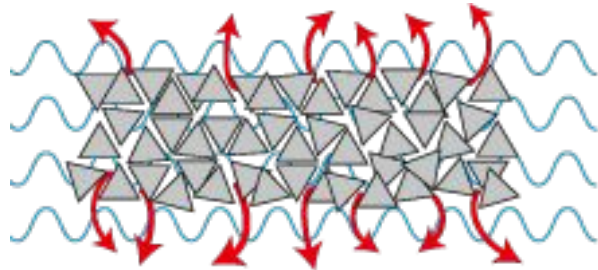

**A disharmonious state of the molecular
cell structure can lead to complaints.**

The working principle of the PowerTube®-TENS-Technology

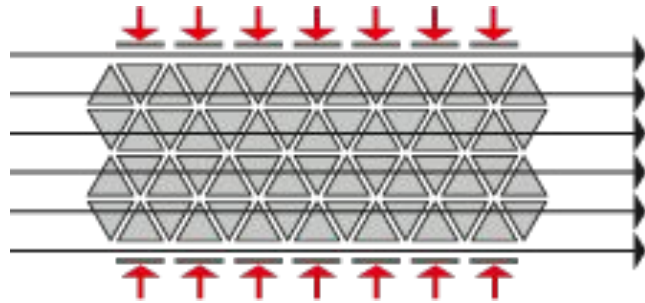

.

The PowerTube® TENS device acts (through the skin) on the molecular cell structure. The 3 basic frequencies with the associated overtone series "vibrate" the molecules. This homogenizes the molecular cell structure.

The working principle of the PowerTube®-TENS-Technology

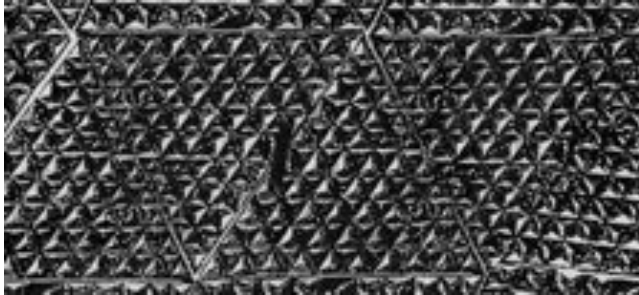

**Molecular cell structure in a
homogeneous, harmonious state.**

The working principle of the PowerTube®-TENS-Technology

.

Mitochondria, magnified 30 million times (even, homogeneous arrangement of the molecular cell structure).
